Industrial, general Steel Structures & Pre Engineering Buildings.

About Recomax

Recomax Engineering provides comprehensive civil and mechanical construction services and industrial sectors. With over a decade of expertise, Recomax, under the visionary leadership of Mr. Raja Datla, delivers solutions that are unique and reliable.

Our services, including Critical Steel Structure Design and Civil Construction, durable infrastructure, from high-quality & Steel Structures to various sectors.

Why Choose **Recomax**

At Recomax, we align our mission with delivering extensive, reliable civil & mechanical construction services, focusing on Critical Steel Structure Design. Quality and client satisfaction are at the heart of everything we do.

By using only premium-grade materials, we ensure superior durability, performance, and long-term value for our clients.

We believe in innovative design, quality craftsmanship, and maintaining the highest standards of reliability

Our Mission

Our mission is to exceed customer expectations by ensuring the use of premium-quality materials that enhance the durability and performance of civil and mechanical constructions.

Our Vision

Our vision is to evolve into a global leader in the construction industry, known for our specialized expertise in industrial infrastructure. We aim to push boundaries, adopting cutting-edge practices that enable us to deliver innovative, sustainable, and impactful construction solutions worldwide.

Recomax stands at the forefront of structural steel fabrication and installation, delivering durable and innovative solutions for a various of projects. With a commitment to precision and excellence, we transform design into reality, ensuring each structure is built to withstand time and exceed expectations.

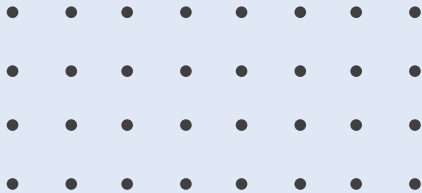

Our Expertise

Structural Steel Fabrication

We specialize in custom steel fabrication, adhering to the highest standards to meet the unique needs of each project. From initial design through to the final product, our team ensures accuracy and efficiency at every stage.

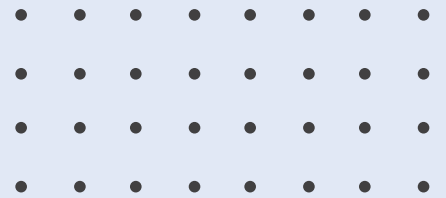

On-Site Installation

Our installation team is highly skilled, experienced, and fully equipped to handle complex structural projects. Whether it's a small-scale framework or an industrial-sized structure, we bring expertise and reliability to every job.

Our Specialized Services

At Recomax, we excel in a range of steel structural solutions designed to support diverse and complex construction Sites. Our expertise includes Pipe Racks for efficient pipeline management, Equipment Support Structures tailored to uphold critical machinery, and Built-up Girders and Columns for enhanced load-bearing capacity. We also fabricate and install robust frameworks for Structural Steel Buildings and High-rise Buildings, ensuring each project is built with strength, precision, and adherence to industry standards. With Recomax, every structure is engineered for performance, stability, and lasting quality.

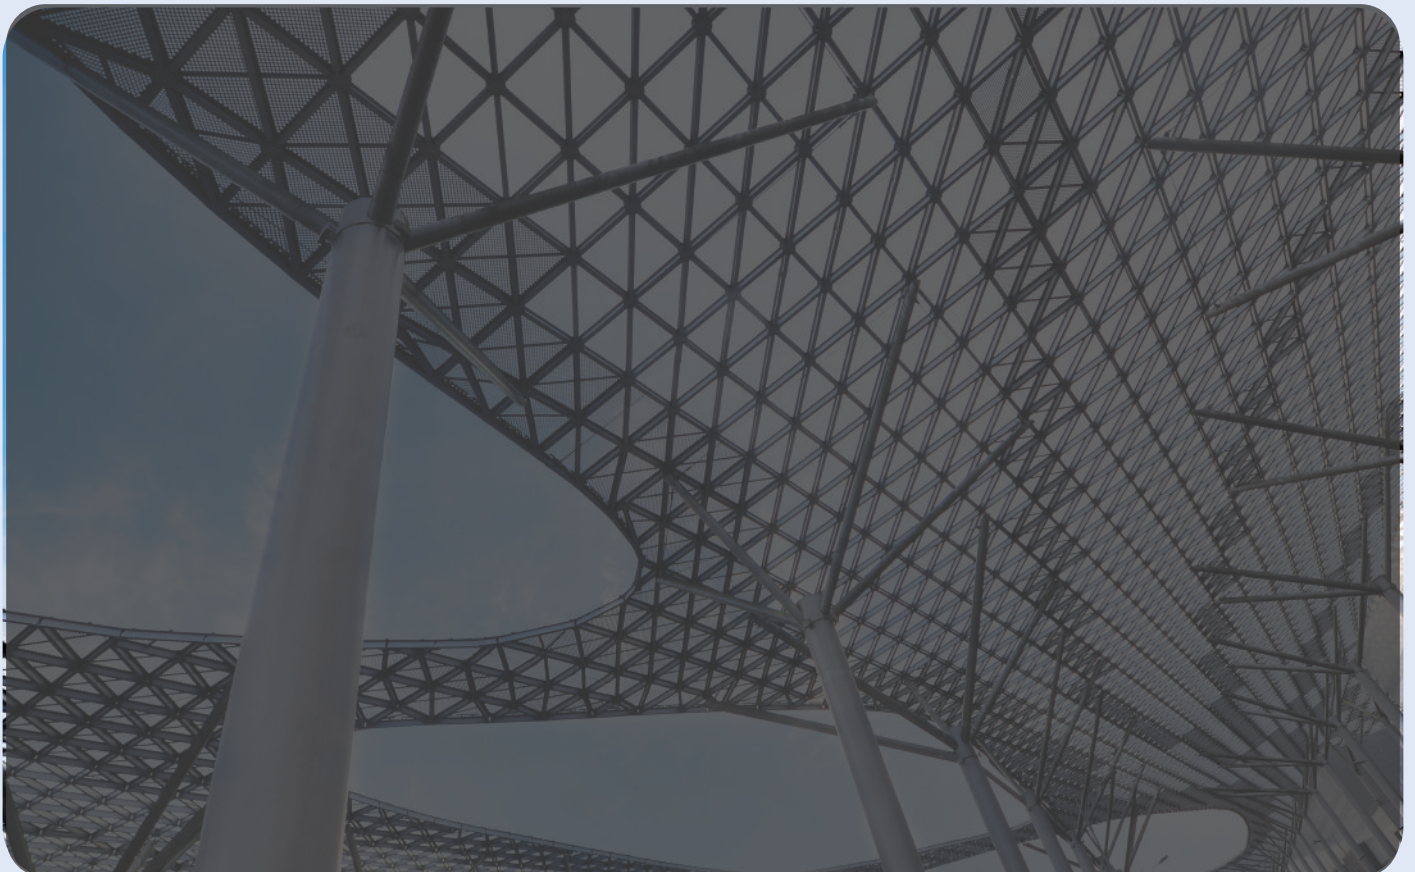

Exceptional Rooftop Steel Fabrication for **Strength and Style**

Transform your rooftop with our precision-engineered steel fabrication services, tailored to blend durability and elegance. Our expertise covers a range of solutions designed to meet both aesthetic and functional needs:

- **Roof Design & Construction:** Expertly crafted rooftops that combine functionality with style, built to withstand the elements and enhance your space.
- **Green Roofing:** Sustainable roofing solutions that promote energy efficiency and minimize environmental impact, helping you create a greener, more eco-friendly building.

With a commitment to quality, our skilled team oversees every step, from design through installation, to ensure results that exceed expectations. Contact us today to elevate your rooftop with the strength, sophistication, and sustainability of steel!

Why Choose **Recomax**?

Precision and Quality:

Every piece we fabricate and install is crafted with the utmost precision, using top-grade materials to guarantee quality and strength.

Expert Team:

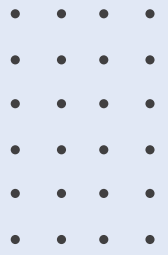

Our skilled professionals bring years of experience and innovation to every project, ensuring that each structure is as strong as it is reliable.

Commitment to Deadlines:

With Recomax, your project stays on schedule. Our streamlined processes and dedicated team work efficiently to deliver on time, every time.

Our Services

Critical Steel Structure Design

Our critical steel structure design services are tailored to meet the diverse needs of industrial and commercial sectors. Renowned for their durability, strength, and adaptability, our steel structures are perfect for a wide range of applications, from industrial plants to commercial projects. Designed to withstand harsh conditions, our steel solutions ensure longevity while maintaining the flexibility to adapt to evolving project requirements.

Our Expertise Includes

Fabrication:

Precision manufacturing of robust steel components, ensuring reliability.

Design & Construction:

End-to-end solutions integrating innovative design with efficient construction techniques.

Pre-Engineered Buildings (PEB):

Efficient and cost-effective pre-engineered steel buildings offering flexibility and scalability.

Maintenance:

Comprehensive services to extend the life of steel structures, ensuring continued safety and performance.

Civil Construction

We take a client-centered approach to civil construction, ensuring that every project meets their unique needs. With extensive industry experience, we specialize in residential, commercial, and infrastructure developments, executing each project with precision and attention to detail.

Recomax is known for delivering top-quality craftsmanship by blending traditional construction methods with modern advancements. This allows us to provide sustainable, innovative, and cost-effective solutions that serve both our clients and the broader community.

Our Expertise Includes:

Design :

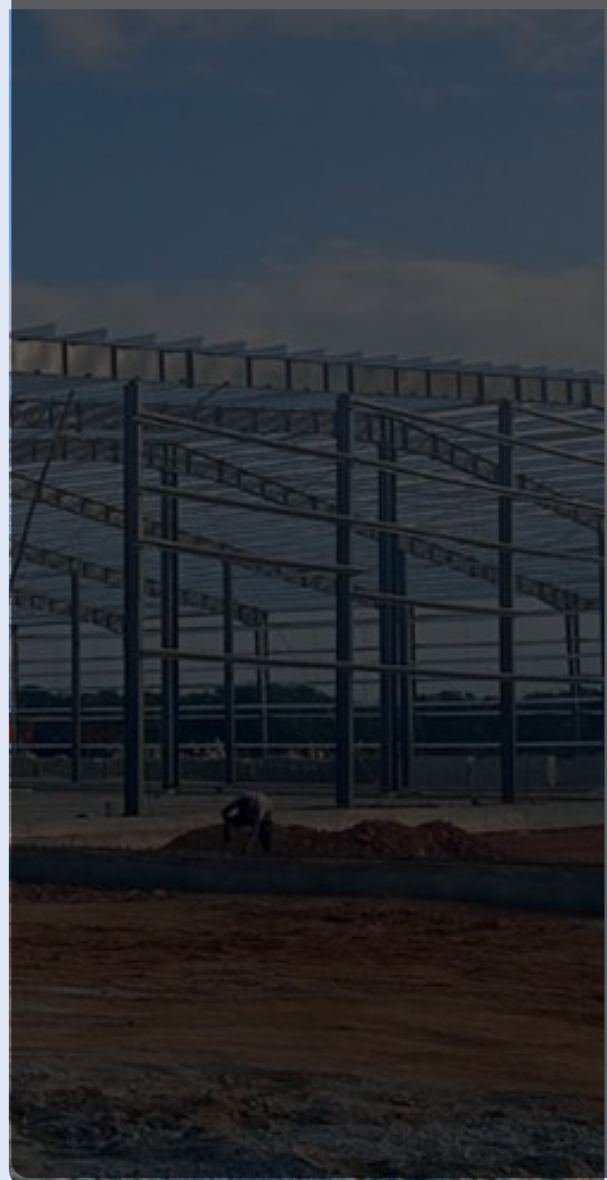

Customized architectural and engineering designs that meet both functional and aesthetic needs.

Construction & Maintenance:

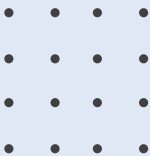

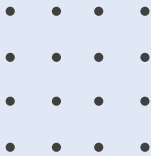

Comprehensive civil construction services, from project initiation to post-construction support.

Quality Control (QC) and Quality Assurance (QA):

Ensuring that every project meets required specifications and safety regulations from start to finish.
